Experience

Senior Software Engineer • **Global Rescue** March 2022 – Present

- Led a small team of 2-3 engineers, working together to meet project goals.
- Upgraded a large-scale application from Angular 13 to the latest Angular 17 version.
- Helped adopt NX micro frontend-based architecture for the Angular project, contributing hands-on experience during the GRID product redesign.
- Implemented front-end styling solutions to create a modern and user-friendly experience.
- Addressed technical problems and stayed informed about the latest trends to ensure the delivery of well-structured code within a modern frontend framework.
- Developed and integrated custom generators to streamline code modifications, reducing redundancy and enhancing codebase maintainability.

Software Engineer • **Turing Technologies** March 2021 - March 2022

- Contributed to the dashboards of an online marketplace (**Unmudl**) for US community colleges.
- Designed and developed a design component library using Storybook, Ant Design, and Styled Components, ensuring UI consistency and reusability across applications.
- Initiated and led the revamp process of the product, focusing on modernization and user-centric improvements.
- Implemented a monorepo based architecture to optimize code sharing and streamline development workflows.
- Contributed to enhancing user experience and platform performance through collaborative efforts with cross-functional teams.
- Provided mentorship and guidance to junior developers, fostering a culture of continuous learning and code quality.

Full-Stack Developer • **Seerbytes** April 2020 - March 2021

- Revamped Fun 4 Friends, a US social platform with 100k+ daily users and \$800k+ annual revenue, using Node.js, GraphQL, and Angular to improve scalability, performance, and UX.
- Built scalable microservices with Node.js, ensuring stability under peak loads.
- Optimized GraphQL queries for faster data handling and smoother user experience.
- Led architectural design for a real estate startup website using Angular, TypeScript, and SCSS.
- Developed backend APIs and an industrial calculator app with Vanilla JS and Express, using Passport JS for authentication and Sequelize for database management.
- Collaborated with teams for timely project delivery and adjustments.

Associate Software Engineer • **Fantisco Technologies** July 2019 - April 2020

- Supported the software development lifecycle, participating in design, development, testing, deployment, and maintenance phases using advanced technologies.
- Engaged in front-end development, crafting landing pages tailored to client needs.
- Designed and implemented a Progressive Web App using Angular and Bulma, resembling Google Keep.
- Assisted in architecting client-side and server-side infrastructure for performance and scalability.
- Conducted software testing for responsiveness and operational efficiency.
- Contributed to technical documentation to support project development and maintenance.
- Engaged with senior engineers to enhance technical skills and team performance.

Technical Skills

Programming Languages

JavaScript (ES2015+), Typescript, HTML, CSS, SCSS

Libraries & Frameworks

Angular, React, Next.js, Redux, Node.js, Tailwind CSS, Styled Components, RXJS, NgRx, Restful API, GraphQL

Tools & Platforms

Git, GitHub, Netlify, Vercel, Heroku, Contentful, Firebase, Storybook, Tailwind, Docker, Webpack, Figma, Bootstrap, Bulma, Ant design, JEST, WebSocket, ESLint, Bitbucket, NPM, Yarn

Project Management & Methodologies

JIRA, Agile/Scrum

Projects

NgLab (Web Builder)

A drag-and-drop web builder, enabling users to create and customize websites that generate Angular applications.

<https://ng-lab-frontend.vercel.app>

Tech-Stack: Angular, NodeJs, GraphQL, MongoDB, Python

Personal Portfolio

Tech-Stack: Angular, Scss, Contentful, Netlify

<https://github.com/mohaseebtariq/v1>

Notes Application

A note-taking tool that leverages the browser's indexedDB for storing notes locally and syncs them with Google Drive for secure backup and accessibility.

<https://notesapp-81d17.firebaseio.com/>

Tech-Stack: Angular, IndexedDB, Firebase, SCSS, Bulma

Education

National University of Modern Languages

Bachelor of Computer Science
